

***Bulletin of Deccan College Postgraduate and Research Institute***  
(Peer-reviewed research journal)

**Guidelines for Contributors**

The aim of this journal is to publish recent and *original* research in the fields of Ancient Indian History, Culture, and Archaeology; Linguistics; Sanskrit and Lexicography; including related topics in environmental, anthropological and historical disciplines. The journal welcomes following types of contributions: research articles, book reviews, review articles, obituaries, and Ph.D. synopses of Deccan College students.

Contributors should send ONE copy of the manuscript (including figures and tables) along with an electronic copy through email in open and pdf formats.

The hard and electronic copies should be addressed to:

The Editor  
Bulletin of the Deccan College Research Institute  
Deccan College,  
Pune 411006, India

Please write “For ***Bulletin of the Deccan College Research Institute***”: on the packet.

An email containing the title of your paper should be sent to:  
[vc@dcpune.ac.in](mailto:vc@dcpune.ac.in)

**Organisation of the Manuscript**

*VI. Title Page*

All contributions should have the following information on a separate page:

1. Title of the paper/ book review/ review article / obituary
2. Names, affiliations, postal and email addresses for all authors
3. Abstract (not longer than 150 words)
4. Keywords (7 words or less)

*II. Main Text*

Manuscript must be in U.K. English; the text typed on double-spaced A4 paper, and should not exceed 7000 words in length. The text should be in Times New Roman font and divided into sections and paragraphs. All headings and subheadings should be marked in bold and subheadings should be italicised. In the case of contributions other than the full articles, the abstract and keywords are not required.

Devanagari Unicode fonts should be used for Sanskrit and the scheme of Roman Diacritics used for the Deccan College Sanskrit Dictionary should be followed.

As far as possible, footnotes and endnotes are to be avoided. If used, these should be numbered serially in Arabic numerals.

*III. Figures and Tables*

Line drawings, graphs and photographs are all considered 'figures'. They should not exceed 20 x 16 cm in size. Each figure must be cited in the text (Fig. 1), and listed in a separate file numbered consecutively in Arabic numerals. Computer prepared photographs should be submitted in the TIFF/JPEG format at 600 dpi. Computer generated line drawings should be supplied as vector graphics using standard system fonts (Arial or Times New Roman). Each figure must accompany a caption and a directional arrow. The legends and symbols used should be readable and adequately large since figures are likely to be reduced.

Each table should be cited in the text (Table 1), and must be listed in a separate file numbered consecutively in Arabic numerals. Tables usually contain headings and numbers. They should not be embedded in the text. A title and caption should be included with each table.

#### *IV. Units of Measurement*

Only metric units should be used.

#### *V. References to Dates*

When citing radiocarbon information the dates should be noted as BP calibrated or BP uncalibrated. The software used for calibration and the laboratory number should be mentioned. K/Ar dates should also include the standard error and laboratory number.

For historical dates use BCE and not BC/AD format.

#### *VI. References*

The reference list should contain only the ones cited in the text. They should be typed after the text, or after the footnotes. As far as possible unpublished manuscripts or those in preparation should not be cited. Personal communications should be avoided. If used personal communication is cited in the text as (e.g. S.N. Rajaguru: personal communication 2002) and is not included in the list of references.

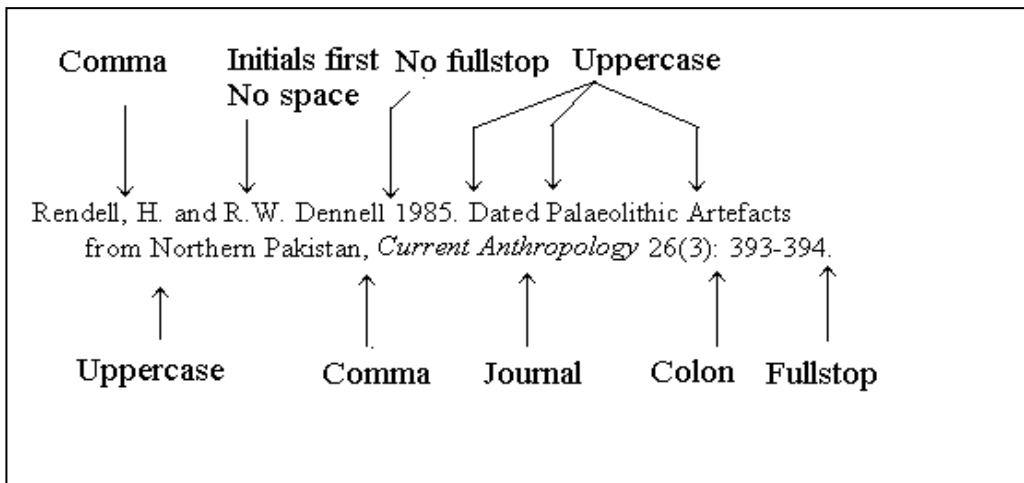

All references should be arranged alphabetically and chronologically. If more than one publication by the same author in the single year is being cited, then a, b, c and so on should be added immediately after the year and in the list of references, e.g. 1982a, 1982b and so on.

All books and journals should be listed in full with no abbreviations. Abbreviated reference forms like '*ibid*', '*op cit*' and '*supra*' are not acceptable. Within the text, all references should be mentioned in parentheses with only the surname of the author and the year of publication, and/or the page number; as follows; e.g. (Lal 1956: 282). There is no comma after the surname and no initials are to be given here. For two authors both surnames must be listed, e.g. (Rendell and Dennell 1985). In the case of more than two authors, it should be as (Hegde *et al.* 1990). Here only "et al." is in italics.

IAR: *Indian Archaeology – A Review*. New Delhi: Archaeological Survey of India.

Lal, B.B. 1956. Palaeoliths from the Beas and Banganga Valleys, Punjab, *Ancient India* 1: 258-292.

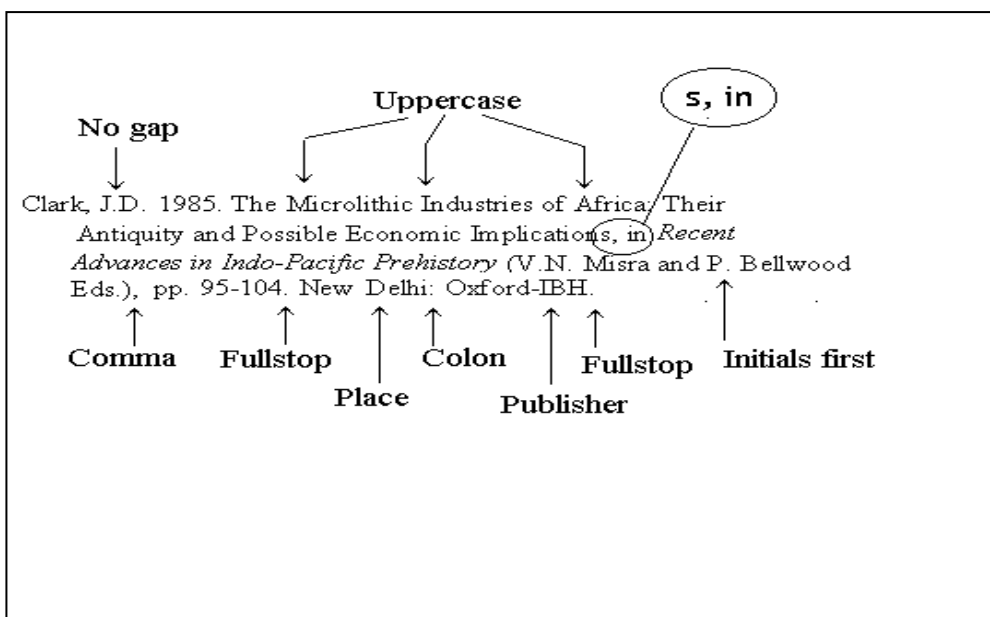

Murty, M.L.K. 1966. *Stone Age Cultures of Chittoor District, Andhra Pradesh*. Ph.D. Dissertation. Pune: University of Poona.

De Terra, H. and T.T. Paterson 1939. *Studies on the Ice Age in India and Associated Human Cultures*. Washington D.C.: Carnegie Institution.

Hegde, K.T.M., V.H. Sonawane, K.K. Bhan, P. Ajithprasad and K. Krishnan 1990. Excavations at Nagwada-1987-1988: A Preliminary Report, in *Adaptation and Other Essays* (N.C. Ghosh and S. Chakrabarti Eds.) pp. 191-195. Shantiniketan: Vishva Bharati Research Publication.

If the citation is from a web page, the correct URL should be listed.

## **Ethical Policy Statement**

### **General Principles**

As a part of commitment to upholding the highest level of scientific integrity and professional ethics in all of its activities, the *Deccan College Post-Graduate and Research Institute* follows fundamental principles of doing research and presentation of results in its journal. The research activity including publication of research findings is expected to be free of any impropriety or undisclosed conflicts of interest, intentional plagiarism, fabrication of data/results, and any inappropriate action that would compromise the integrity of science.

### **Ethical code for authors**

In order to maintain highest quality research and its publication authors are assumed to have done the following.

- (1) The article should not be sent for publication to any other journal/ edited book/felicitation volume/ memorial volume, in any form.
- (2) Include sufficient details and references to sources of information so that the peer reviewers would get a comprehensive picture of the work. Limitations on use of, or access to, data and other relevant information, must be clearly identified.
- (3) Identify sources of all information and cite those publications that have been used during the research process. Ignoring previous contributions in the field of research must be avoided even though such works may be presenting the opposing views/conclusions.
- (4) Information obtained privately, as in conversation or correspondence, should not be used or reported without explicit permission from the source. For citing as “personal communication” a written permission must be obtained before submitting the manuscript.
- (5) For any article based on excavation/excavated material from India, the corresponding/first author will have the full responsibility of getting necessary permissions.
- (6) If the article is based on analysis of artefacts/ archaeological samples (including biological material) conducted outside of India, the corresponding/first author will have the full responsibility of getting necessary permissions.
- (7) Give a precise and accurate account of the methodology, assumptions and objectives of the research performed and a clear discussion of its significance.
- (8) Avoid redundant publication of research reports to artificially increase the number of publications or size of the article.
- (9) Do not include personal criticism or any comments based on gender, caste, religion, race or nationality.
- (10) Include as coauthors only those persons who have made significant contributions to the work. Determine order of authorship in a manner appropriate to the contribution. All coauthors share ethical and legal responsibility for the quality and integrity of the published manuscript.
- (11) The corresponding/first author must ensure that all coauthors are informed about the full manuscript and that they have agreed to its publication. The corresponding/first author must provide full postal address and e-mail of all the coauthors.
- (12) All funding sources and sources of data, or other in-kind support for all authors in the acknowledgments must be clearly mentioned.

- (13) The authors must avoid plagiarism (using another person's words or ideas without giving credit to that person or that person's work). This includes using text, figures, tables, or ideas, and includes not just duplicating any of these items but also close paraphrasing of text that still represents someone else's ideas or work.
- (14) The authors must avoid self-plagiarism (reproducing your own work without changes).
- (15) The journal strictly follows the code of ethics and code of practice regarding the research and analysis of human remains outlined by the *British Association for Biological Anthropology and Osteoarchaeology* (<http://www.babao.org.uk/publications/ethics-and-standards/>).  
A special care must be taken to follow the applicable guidelines for human studies and animal welfare regulations when such material has been used as data source. All materials and data in the manuscript must be acquired following current ethical standards and, wherever required, have been duly approved by the appropriate ethical committee/s. For studies involving human material (including ethnographic surveys), authors should state that subjects have given their informed consent. Unnecessary details that might compromise subjects' social position or damage personal reputation must not be included in the manuscript. In general, both human subjects and human remains must be treated with respect.
- (16) No article based on illegally traded antiquities or antiquities removed from their original provenance, will be accepted for publication. *Bulletin of the Deccan College Research Institute* assumes that all authors are aware of the *UNESCO Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property* (1970) and all subsequent provisions made in the treaties. *Bulletin of the Deccan College Research Institute* will not accept articles based on artefacts/objects in private collections made and not declared before 1970.
- (18) It is expected that all the data/ maps/ photographs/ drawings/ illustrations/ flow charts, etc. being used for the research articles are authors own contributions. If these are from other sources, it is assumed that necessary written permission from the concerned persons or institutions for using these has been taken.
- (19) All maps must be as per Survey of India (SOI) official maps and confirming to the National Map Policy (2005). A special care must be taken to show the northeastern Indian states and the State of Jammu and Kashmir in correct form. Maps taken from other sources (including the internet sources) will not be acceptable. For more details visit <http://www.surveyofindia.gov.in/pages/display/251-instructions-for-publication-of-maps-by-govtprivate-publishers2016>
- (20) The author should be aware of all provisions of the Copyright Act 1957 enacted by Parliament in the Eighth Year of the Republic of India [No. 14 of 1957 as amended up to act 65 of 1984], and the procedures dealing with infringement of the copyrights.
- (21) The authors should note that the copyright of the published articles is with the *Deccan College Post-Graduate and Research Institute*. No articles published in *Bulletin of the Deccan College Research Institute* can be used, duplicated or reproduced, fully or in part, without the written permission from of the Editor.
